SUBJECT [REDACTED] Monthly Support RE: Supplemental Narrative

ACTION REQUIRED - REFERENCES

REF: Logistics 9207

1. 9-14 June 1969

Projects

[REDACTED]

construction consists of an underground bunkered area. Help was requested [REDACTED] in the following areas:

a. Air Conditioning. Assistance was given in the local procurement of components for a complete system which tonnage and type of system was designated by a [REDACTED] in Saigon. Contact was made with a local A/C manufacturing company and specifications presented for the system components. The product will be locally manufactured to Trane standards using Coplomatic compressors and Japanese, Chinese, and U.S. controls. The factory was visited and conversations held with the factory engineers and designers. The product being produced appears to be first class. A schematic and operation plan and control drawing will be furnished. Delivery is expected to take three weeks. System will consist of four six ton package units and one thirty ton air cooled condenser, which will be supplied with two spare motors and fans. It was requested that construction drawings and bill of materials be forwarded [REDACTED] for review.

b. Water System. The water system that has been installed at Project [REDACTED] does not provide for sufficient pressure to operate the flush valves. The [REDACTED] was requested to design a pressure system to correct this deficiency. A design and a bill of materials was furnished for a pressure system and an automatic chlorinating system. Cost of locally procured materials is approximately \$2,000 (U.S.). A complete package will be procured locally and air lifted to Vietnam.
